APE V-CURVE®

A SHOP ON THREE WHEELS

The patented Ape V-Curve is the most compact shop on wheels. A mix of design and technology make it unique and irresistible.

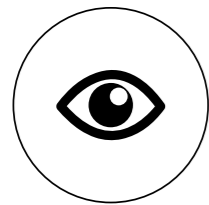

Its smaller dimensions and reduced weight guarantee versatility and flexibility.

The extendable roof increases the vehicle's dimensions during operation, making it both visually appealing and comfortable to work in.

If you are looking for a motorized vehicle that can set your business apart on the street food market then the Ape V-Curve is for you!

AN ITALIAN CULTURAL ICON

An icon that has reinvented itself by staying true to the past. Our Ape Piaggio V-Curves[®] are designed with the utmost attention and are built to make the client's work easier.

APPEALING

A patented, unique and original vehicle.

CATEGORY B DRIVER'S LICENSE

Drivable with a European category b driver's license.

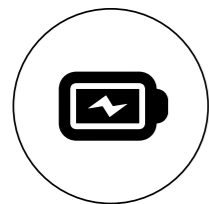

ERGONOMIC

Ergonomically excellent despite being vintage.

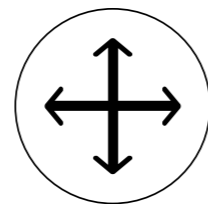

FUNCTIONAL

The vehicle is equipped with two internal working spaces.

AUTONOMOUS WITH ZERO MAINTENANCE

100% autonomous and easily maintained.

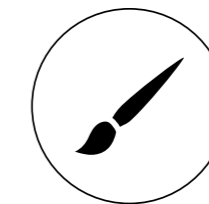

RETRACTABLE ROOF

The manually retractable roof increases the vehicle's space, allowing for two certified interior workstations.

LIGHT AND RESISTANT

A light and compact model suited for any situation.

CUSTOMIZABLE

It can be customized in every detail: color, lighting, material, artwork and accessories.

CUSTOMIZE YOUR APE V-CURVE®

Choose the color, materials, lighting, artwork and accessories. Each detail is important for your brand.

- Built-in refrigerating thermostats
- Storage cabinets along the entire perimeter
- Stainless steel counter

OPTIONAL

- Logo milling
- Signs
- Shelves
- Whiteboards
- External lighting
- Customized adhesive artwork

FAQ

- If I want it bigger?

It's not possible! The structure respects the maximum measures allowed for the certification test. With these characteristics the vehicle is safe and up to code.

- I'd like to open a third wall.

It isn't necessary. The structure has been created specifically to manage the flow of guests from just one side, so as to make the workers' jobs easier. Additionally, a third side is difficult to manage for positioning the vehicle as it would have a width of around 5 meters. The covered side is needed as protection in case of bad weather and allows the workers to carry out tasks without problems

- It's cold. I'd like to close the back wall.

The structure is designed to make the vehicle easily accessible. Methods and systems exist for internally heating the vehicle. Contact us to discover possible solutions: info@vsveicolispeciali.com

- It's too tall!

The telescopic roof is necessary to organize an approved and compact vehicle when it is closed and spacious, and up to health code when it is open.

- Can I work without an electrical outlet?

Yes! If you need to be autonomous we can provide your vehicle with an electrical generator for the refrigerator, light and water, and can install a gas system for the kitchen equipment.

- The counter is too high. The customers can't see my products!

Your items can be effectively communicated through the customized artwork on the Ape and with the help of the whiteboards. The artwork on the model and the accessories allow one to specify the service offered and the product being sold. The customer doesn't need to see what you are preparing. What's important is that the product is communicated in the best way possible.

Be productive,
be chill,
be vintage.
